CAN NOISE BE MUSIC TO THE EARS?

You can't expect to reverse entropy, but there's nothing wrong with recycling a little noise into music with THE INFINITUNE. When it comes to noise, white is not beautiful, so we settled for "1/f noise".

* * *

WHAT YOU GET FOR \$75: A kit which, when assembled, is an 8x6x2" attractive enclosure of electronic parts, including 12 adjustments to modify statistics of automatically controlled pitch and duration, and to set envelope, register/key and tempo, of a continuously generated sequence of musically related tones (monophonic) which follow trends very similar to human-composed passages--when you connect it to your audio system.

WHAT YOU GET FOR \$150: Physically, exactly twice as much--two of the above kits. However, musically the whole is much greater than the sum of the parts. When the two units are synchronized and relatively tuned, from nowhere a conductor appears to orchestrate them in harmony and counterpoint.

GUARANTEED all organic, natural electronics; no computers are used. Yes, people will still listen to Beethoven now and then.

AVAILABLE June 1977.

SPECIFICATIONS:

Register range: Similar to piano.

Register extent: 3 octaves, tone select statistics contin./

Tempo: Full common musical range. settable

Rhythm: Continuously settable full range of statistics on occurrence of 3 note durations related by factors of 2.

Scale: Pentatonic (5-tone) (modifiable to any 7-tone scale--means of discord elimination required for more than one unit in harmony).

Timbre: Square wave with good roll-off of harmonics.

Envelope: Full range of individual settings of attack, sustension and decay.

Real-time control: None required; vanes may be added to manually, through capacitance variation, influence statistics of pitch choice and note duration choice.

Electrical connections required:

Power: 115 v. a. c.

Output: Apply to high-level input of any audio or stereo amplifier or receiver.

USABLE AS CONTROLLER FOR MUSIC SYNTHESIZER (INTERFACE REQD.).

IF YOU CARE TO BE THE FIRST ON YOUR BLOCK AND BEAT THE RUSH-HOUR TRAFFIC which will result from readers of a national magazine where this kit will be cover-featured in the June issue, send your check today on a first-in-first-out basis (out starting June 15, 1977).

Send 1 INFINITUNE - - \$75.00 postpaid in U.S.A.

Send 2 INFINITUNES - - \$150.00 postpaid in U.S.A.

California residents add 6% sales tax - - 6½% in transit districts.
